

VEHICLE SPECIFICATION

HIGH SPEED CAMERA CAR

- Based on customized, high-performance **Mitsubishi Lancer Evolution X** with more than **420 HP**. Technically equipped, with crew of four on board, can operate at **speed up to 200 km/h**.
- Fitted with front or rear mounted pole with **maxi shock absorber** and **hydraulic dampener from GFM** compatible with any gyro-stabilised head.
- Hard mount is possible.
- It takes less than **10 minutes** to safely change camera position from front to rear mount and vice versa.
- Left/right and up/down movement is only **matter of seconds**.
- Due to a low center of gravity, such set-up allows safe and fast precision driving with high control.
- **Maximum** possible lens height is approx. **260 cm**.
- **Minimum** safe operating camera lens height above surface is **30 cm**.
